Revolutionizes the entertainment industry

In a world where the entertainment industry often seems to be trapped in the past, our team of passionate dreamers has a bold vision for the future.

We call ourselves NarativLab, and our mission is to revolutionize the film industry by infusing it with a fresh and modern perspective. Our goal may be ambitious, but we are more determined than ever to turn it into a reality.

We firmly believe that traditional methods of film financing are not only outdated, but also too controlled by large corporations, leaving countless talented artists struggling to fund their work and causing many promising films to never see the light of day.

Room for Improvement

Funding Issues

The financing of films in the film industry is a major challenge. High production costs, financial risks, and investor demands are all factors that make it difficult to obtain the necessary funds to create high-quality cinematic works.

Underpaid screenwriters

Lesser-known screenwriters are often underpaid despite their crucial contribution to a film. They usually receive only a few thousand to around \$10,000 for a simple script, which affects both established professionals and newcomers.

A Centralized Industry

The film industry is dominated by 5 American companies, who control over 75% of the market. They focus on acquiring new competitors to grow their businesses, which leads to limited diversity in the films shown in cinemas.

Creating a fair film industry, all together

We use blockchain technology to create a decentralized and compassionate ecosystem for the film industry, enabling talented artists from around the world to finance their projects on a global scale.

Our community funding system ensures equitable profit distribution among all involved parties, including the team, actors, and funders.

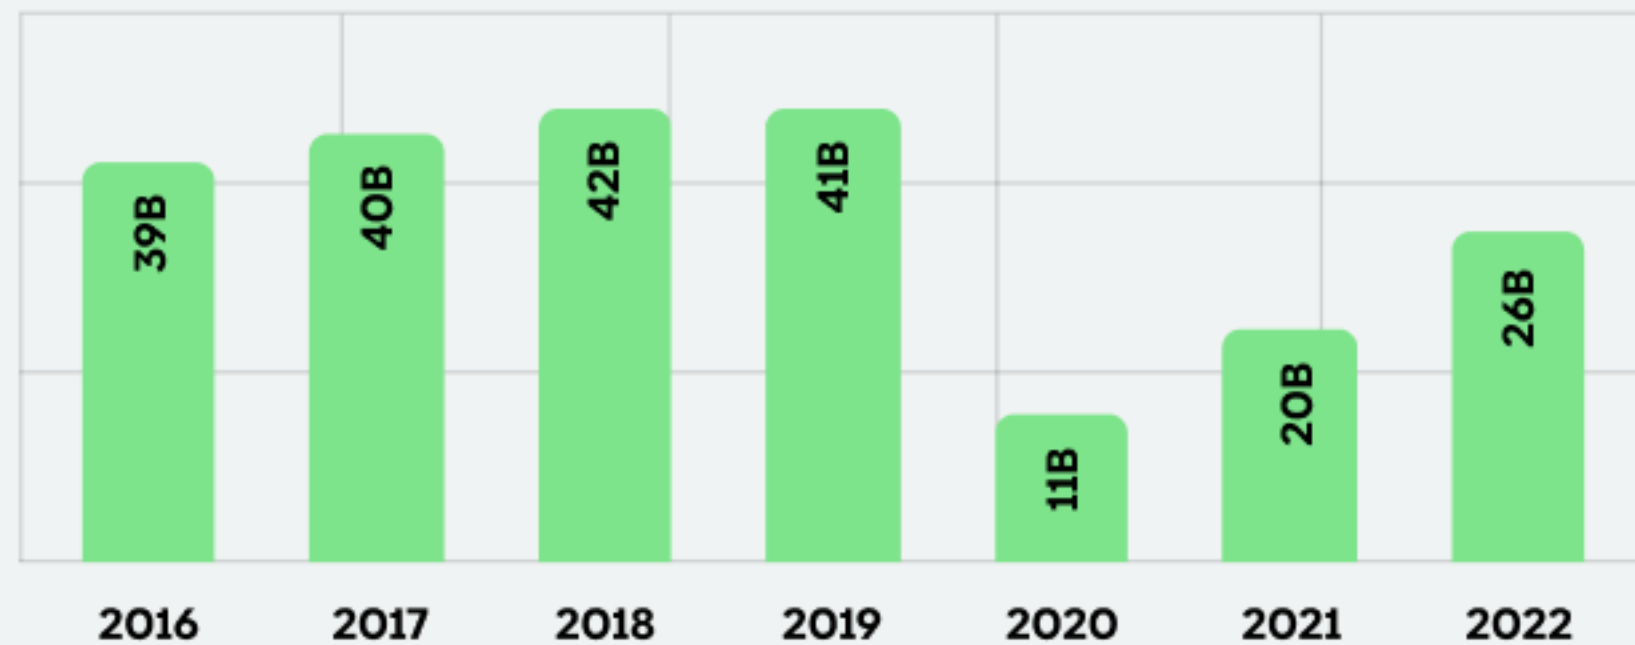

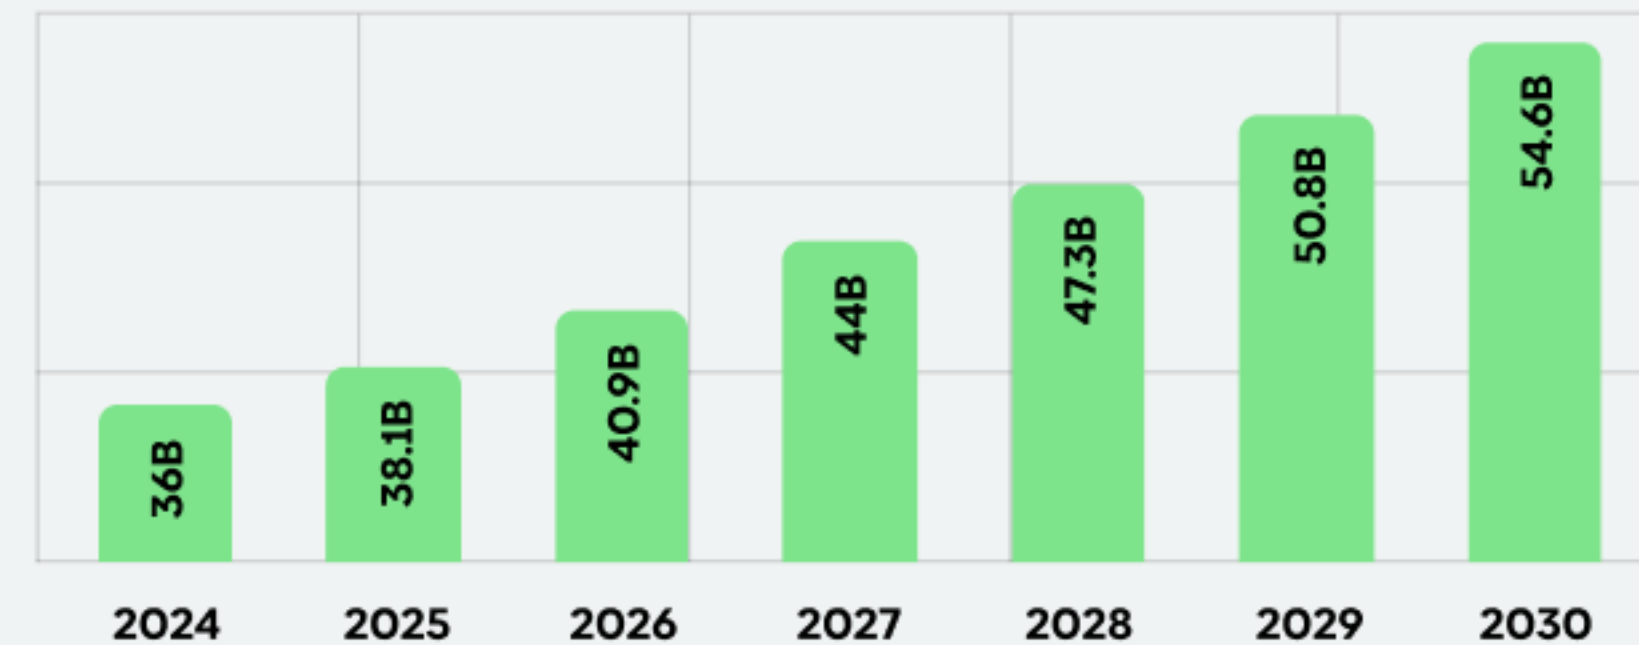

A Look into the futur

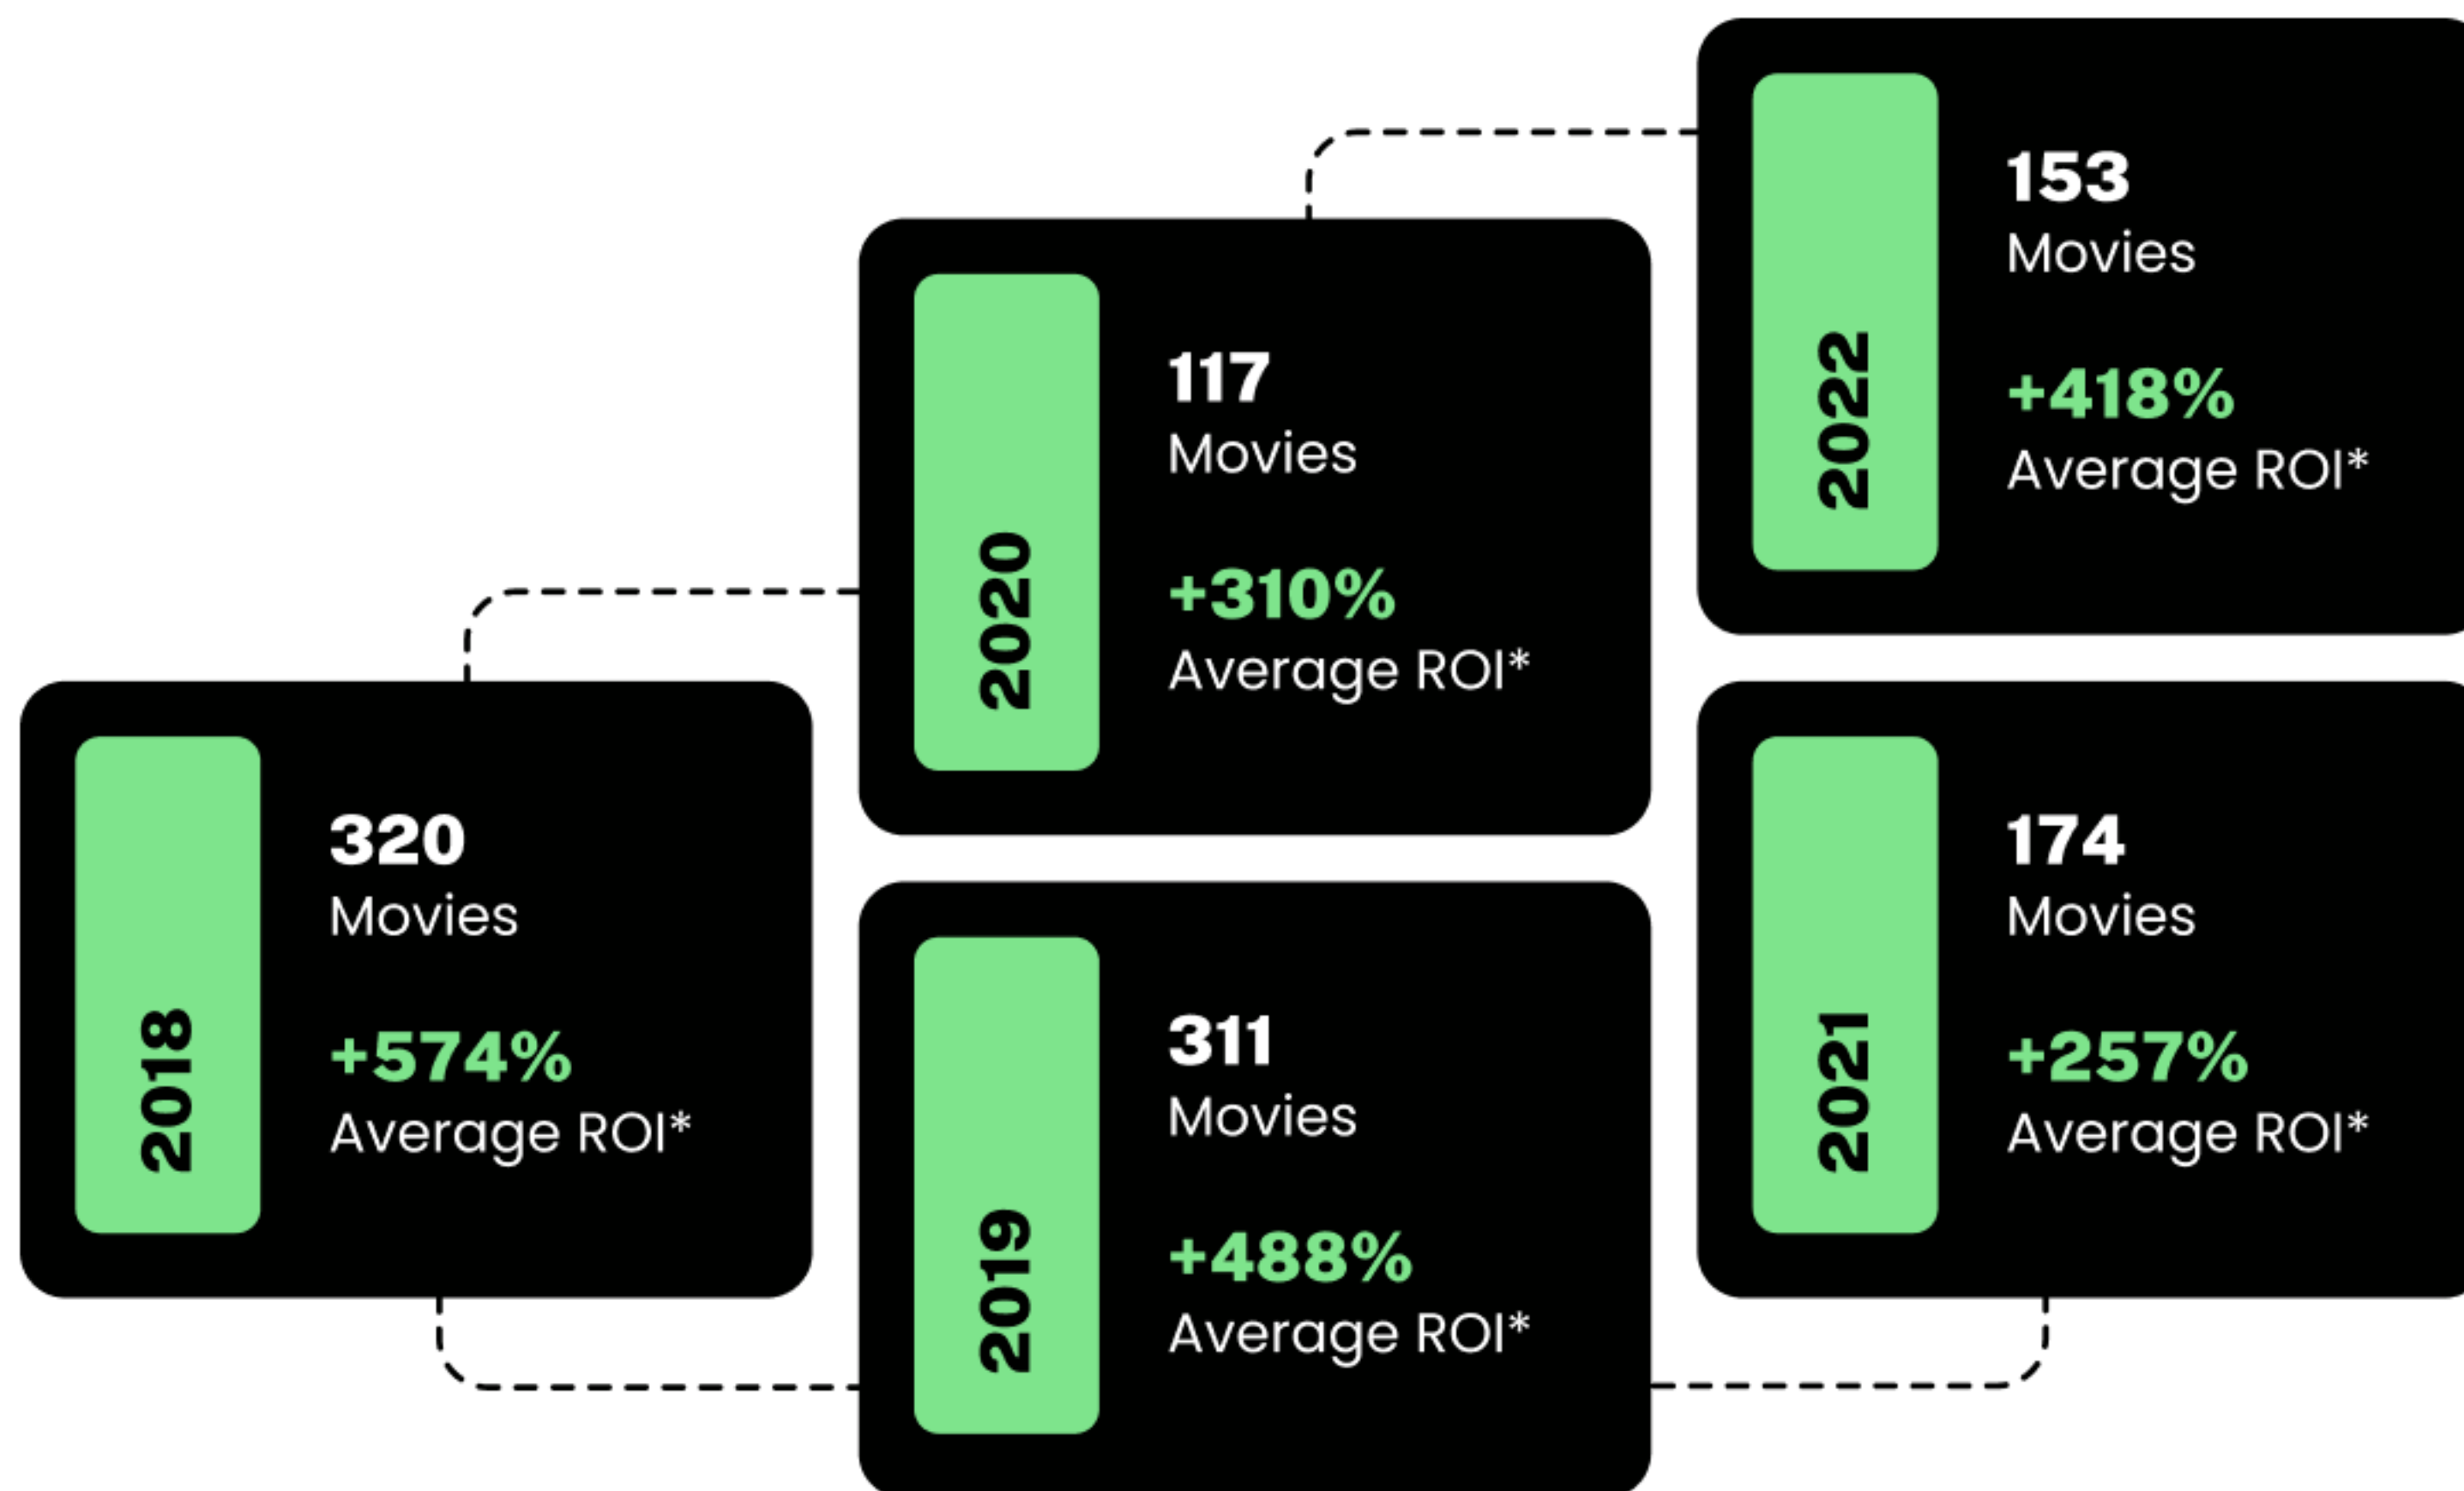

Since its inception, the film industry has seen consistent growth. Although the 2020 pandemic caused a significant downturn, results for 2021, 2022 and 2023 show strong consumer interest. According to a study by Grand View Research, the cinema and entertainment market is expected to continue to grow significantly, with an anticipated growth of over 7,2% per year until 2030.

Revolutionizing Screenwriter Compensation

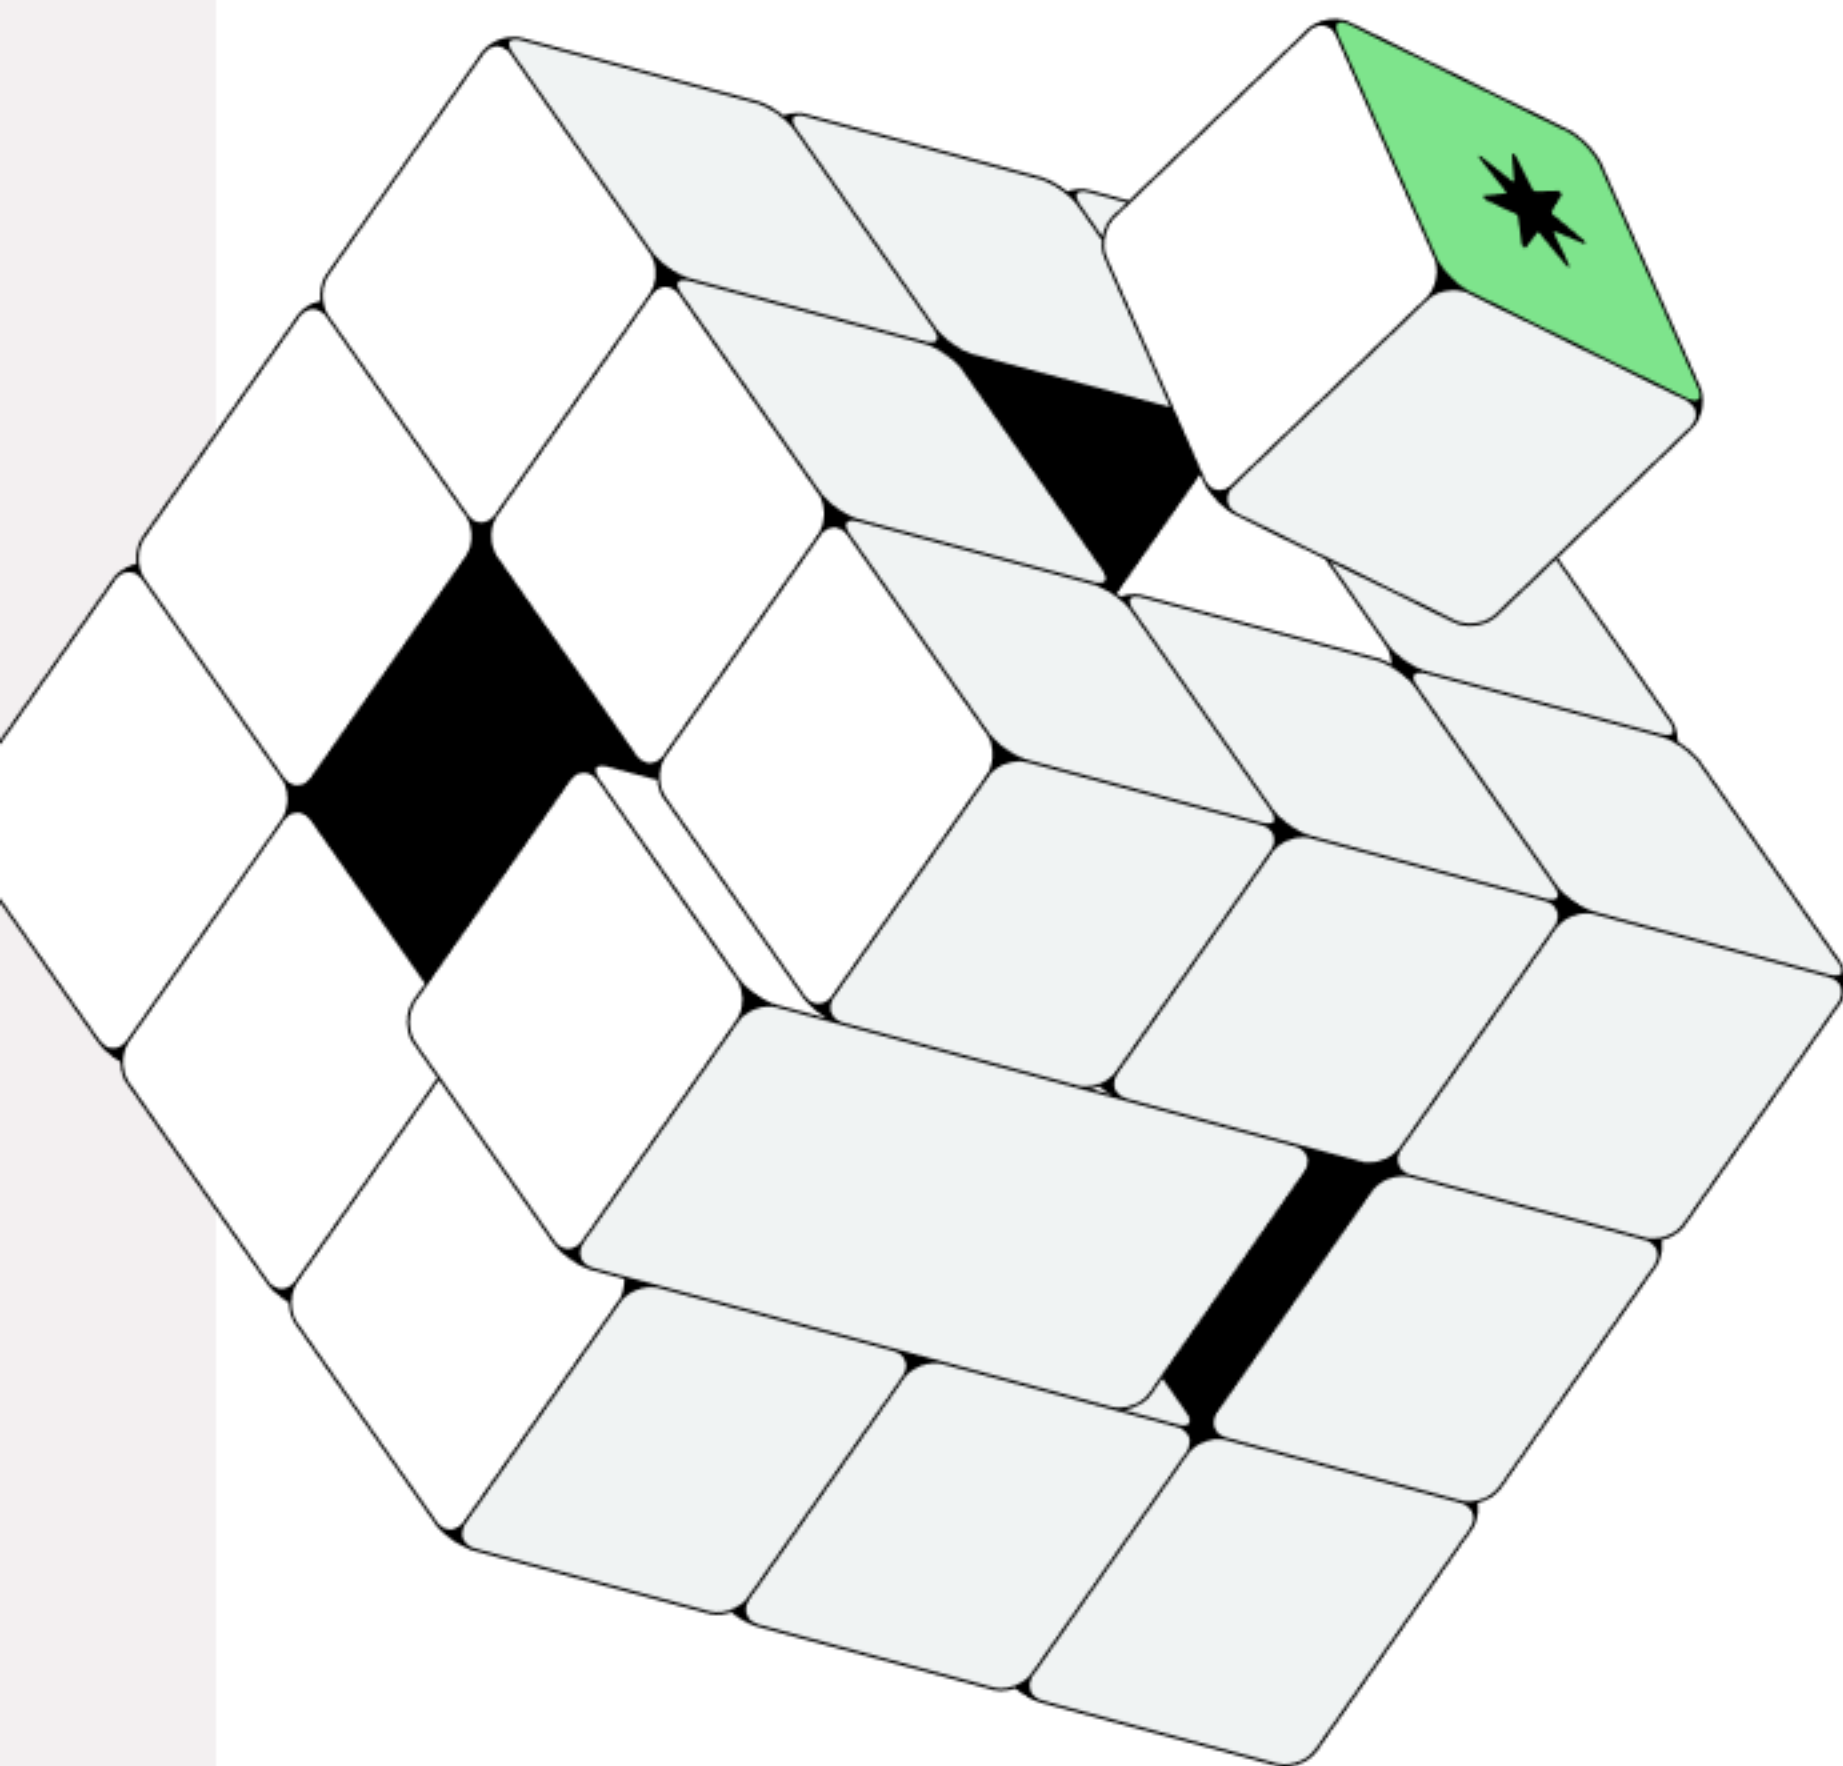

Many screenwriters face the issue of being underpaid for their work.

Despite the significant contribution that they make to the success of a film. This disparity in compensation not only undermines the morale of writers but also has a negative impact on the overall quality of content produced by the industry.

However, we have a different vision when it comes to compensating these lesser-known talents.

We offer a 3% compensation of the film's total sales to screenwriters

A simple form to fill

Artists can submit their ideas on our website. We are committed to providing an answer as soon as possible on our decision making. Narativlab guarantees confidentiality and respect of copyrights.

And after?

If your project is selected by team, we will reach out to schedule a meeting with our team and all related expenses such as flight, accommodation and restaurants will be covered by NarativLab.

Create everything, all together

We use blockchain technology to create a decentralized ecosystem for the film industry, allowing artists from around the world to fund their projects on a global scale.

Our crowdfunding system ensures a fair distribution of profits among all parties involved. Investors must have investment tickets to invest in a film, which can be earned through two methods. Each investment ticket will have a maximum investment.

Narativ Pass

Owning a Narativ Pass
1 Pass = 1 investment ticket per film

Blockchain Technologies

The Pass and NRT Token leverage the power of blockchain technologies to ensure security, transparency, and enhanced efficiency in transactions.

This cutting-edge technology creates a streamlined ecosystem, enabling users to have complete control over their NRT Tokens and Narativ Passes.

Narativ Dashboard

We have created a comprehensive dashboard to allow investors and Narativ Pass holders to interact with the entire Narativ ecosystem.

Vision

Our goal is to take this project as far as possible by creating an ecosystem that combines the digital world with the physical world.

However, the success of this project will depend entirely on your support. Our initial goal is to help screenwriters finance their films and allow investors to benefit from high returns in the film industry. Cinema is just one of the many activities in the entertainment industry.

This economic model can be extended to series, music, concerts, festivals, and many more. In the spirit of collaboration and cooperation, our team is open to partnerships, whether with web3 projects, traditional companies, or with talented members of our community.

We look forward to keeping you updated on the progress of the project. Thank you for your attention, and see you soon.
